PROSPECTUS OF THE "NATIONAL MON-UMENT,"

A weekly journal to be published in Washington, under the sanction of the Washington National Monument Society.

Monument Society.

JAMES O. PICKETT, EGY. NAD PUBLISHER.

The Mortument is intended to be an terrary, agricultural, and miscellameous paper. If will contan a selections of the literature of the day—the best thatem be, found in American and English publications: interesting seis difficurticles, embracing mechanics; foreign and domestic Plews; a synopsis of the proceedings of Congress, and eve. I thing that such a journal might be expected to contain, with the exceptions of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of adding in the excetion of the noble column now rising on the banks of the Potomac, in henor of the Father of his Country, and which every one who venerace the name of Washinston would rejoice to see completed. After deducting out of the subscription the expense of the Journal proposed to be published, the remaining funds will be faithfully applied; and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patricide an object, and one so entirely national, is carnestly requised. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic memorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, formerly Fourth Auditor of the Treasury and Charge d'Affairs to Perri, who proposes to edit and publish the Monument journal, as one well qualified to perform the duties of editor, and to conduct the peoper faithfully, and satisfactorily to the subscribers. They assure their fallow-citizens that this enterprice is not a speculation got up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more, than a new propose of the Monument will be, in any event, applied to the support of the paper, nor the Society in any manner hel JAMES C. PICKETT, EOTA'R AND PUBLISHER.

dollars per annum, payable on the receipt of the second number. The nature of the enterprise not admitting of any credit, none can be given.

Societies and clubs will be furnished with the MONUMENT on the following terms: 3 copies for \$5; 5 copies, \$5; 10 leges.—Key copies, \$15; &c.

Those who are disposed to patronise the MONUMENT are requested to forward their names to the General Agent, without-delay. The first number will be published early in May; and the second on the second day of August, and weekly thereafter; time being allowed for the Prospectus to be directlated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

Through in six minutes. For the preparation of Ice Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—

1st. The astenishing rapidity of the process, surpassing belief—hence the name.

2d. The Cream during the progress of freezing becomes charged with atmospheric sir, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freeze does.

4th. It does its work better, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in Ice, as the tub needs no replenishing during the operation.

The annexed lestimonial from the Proprietor of the Rutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream in Austin's Magic Freezer, two quarks of Cream having been frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

H. JACKSON,

Butaw House, Baltimore, May 15, 1848.

"This is to certify, that during the summer of 1848, I used one of Austin's Patent Ice Cream Freezers of the largest size, (10 gallons,) making from 10 to 50 gallons per day during the season; and so far as regards expedition and power, I consider it decidedly the best freezer now in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Cream from five of plain Cream, in thirty minutes from the time I commenced working it.

PHILOSOPHICAL APPARATUS.

The College is provided with a Philosophical Apparatus that furnishes ample means of experimental illustration in all the different branches of Natural Philosophy. The sum of three thousand dollars has recently been expended, partly in this country and partly in London and Paris, in the purchase of new apparatus, adapted to the present advanced state of the Physical Sciences.

EXAMINATIONS.

At the close of each study, or branch of study, the members of the class are carefully examined, and, at the close of the year, in all the studies of the year, in the presence of a Committee of the Trustees; and their attainments are communicated to the Board of Trustees.

RELIGIOUS INSTRUCTION.

RELIGIOUS INSTRUCTION.

In addition to deally morning and evening prayer, divine worship is held twice on every Sunday, and the recitation on Monday morning is always in the Greek Testament. At the requested his parent or guardian, a student is permitted to attend any place of worship which himself or the parent or guardian may select. One member of the Saculty will attend at each of the different places of worship (fresbyterian, Episcopalian, and Methodist) in the village, and note all absentees.

Two at least of the Professors, with their families, will reside in the Collega buildings, and will board at a common table with the students, who are required to occupy such rooms as may be assigned them by the Faculty.

ADMISSION.

In order to admission to pursue the entire course, a student must be at least fourteen years of age; must give satisfactory evidence of good moral character; and must sustain an examination in the following studies, viz: Arithmetic, Elements of Algebra, Latin and Greek Grammar, Jacob's or Felton's Greek Header, and the first two books of Xenophon's Anabasis, Jacob's or Doering's Latin Reader, Sallust or Cæsar, Cicero's Solect Orations, and Virgil, or what shall be deemed equivalent.

Rewark Asademy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to pince it upon a new and improved foundation, and to emlow it with setsuntages possessed by few similar institutions in the country. The Academy, heretofore merged in the College, and of course subjected to all the wils which have been found to attend the amalgamation of the two-departments in the same building, and under the same government, new enjoys the privilege of a separate establishment, without lesting those which result from its relation to the College proper.

A large and elegant edifors, with all the necessary fixtures of a complete boarding establishment, has been erected and furnished, in which the students of the Academy heard, under the immediate charge of the Principal and his Assistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests of operations of the other department. The furniture of the study rooms and dormitories has been chosen with peculiar reference to somfort and convenience for study; and no expense has been spared in providing the apparatus necessary to reader the means of instruction complete; giving to Newark Academy facilities for private study and comfortable accommodation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy anjoy many advantages not generally obtained at lastitutions of this kind. My own case was Dyspejets of long duration, and very aggrevated in its character, manifested by an almost total destruction of the digestive functions, great debility, nervousness, emeasifien, and impaired appetite, with pain, and a burning sensation in the left side of the chest, palpitation of the heart, vertigo and congestion in the head, and many other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my fiends, in which your Medicine was taken, were Dyspepsia, Chrone Headache, and Sore Throat, in all of which it proved efficacious, after the trial of a vast number of other remedies without benefit. Your medicine is us pleasant to the tasts as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeebled energies of the digestive organs, and imparts strength and reanimation to the whole system.

58 Folumes, with a complete Index to the first 47 Volumes.

Since volume 30 of this series, The English Common Law
Reports have been reprinted in full. With volume 44, we
commenced binding each English volume separately, instead of, as formerly, two English in one American volume.

Price—For the first 43 vols., \$2 50 per vol.

For the succeeding, 2 50 "

The reputation which these Reports maintain in England and in the United States is known to all the Profession.—The low price at which they are offered, compared
with the rates of some of the principal American Reports,
of even interior merit, recommends them particularly to
the attention of those purchasing Libraries.

A General Index to the first 47 Vols. of the English Common Law Reports.

By Hon. General Sharswood and George W. Biddle, Eagra. 1 vol. 870.—\$5 00.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, elaborate Arguments, &c., &c., sufficient, probably, for the Elucidation and Prosecution or Defence of any case that can arise in our Courts of Law; and being thus made easily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

their value to the Profession in this country:

Messrs. T. & J. W. Johnson:
Gentlemen.—In reply to your letter, I can with great sincerity say, that I entertain a very high opinion of the recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning, ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deem of more importance or value for a Professional Library.

CAMBRIDGS, January 25, 1845.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyor, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours,

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realize the expectations of those who have enjeyed Smith's Mercantile Law, Touchstone, Broom's Legal Maxims, Archbold's Nisi Prius, Archbold's Landlori and Tenant, Crabb on Real Proporty, Smith on Contracts.

The high reputation which the "Law Library" has acquired throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contents have been presented to the Profession, is the best evidence we can ofter of its merits and its claims for your support. We hope, and will aim, to retain this high character.

From 1796 to 1840—To be continued.

The Decisions upon the Crown Cases reversed for the consideration of the Twelve Judges of England, are of the first importance to the due administration of the criminal justice of the country; and in committing to the press those which have occurred during a recent period of more than forty years, the publishers believe that they are making an acceptable communication to the Profession and the public.

The three volumes already published contain all the Reversed Cases since Leach;

FURNISHING MAIL LOCKS AND KEYS.

Post Office Department,

Murch 14, 1851.

I being desirable to substitute locks and keys of some other kind for those now in use for the mail service of the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered at the Post Office Department until the first day of July next. or the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered at the Post Office Department until the first day of July next. The different locks will be submitted to a commission for examination and report. Upon this report, contracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the part of the Postmaster General, for the time being, to extend and continue the contract in force for an additional term of four years, by giving to the contractor a written notice to that effect, not more than mine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that lock suitable for the mail service should possess the following qualities, viz: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand new locks and keys now in use, about thirty thousand new locks and keys now in use, about thirty thousand new locks and keys in the contractor within seven months after the contract shall have been entered into; afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post office Department.

The kind of lock adopted must be patented, and the patented with any other party or parties as he may s

HUNT'S MERCHANTS' MAGAZINE
AND COMMERCHAL REVIEW.

BY FEWERIAM HUNT, EDITOR AND PROPERTOR.

THE Number for December, 1860, completed the treasy ty-third semi-annual volume. The work has been enlarged since its commencement in July, 1869, and each volume now contains signe than seven frundred large co-tave pages. A few complete sets of the Magazine may be obtained at the publisher's office, 142 Futton street, New York, nearly and substantially bound, for two dollars and a half per volume.

The following are a few of the many commendatory letters received by the editor of, the Merchante' Magazine from distinguished statesmen:

Letter from the Hon. Henry Clay.

Asmans, 20th July, 1849.

Dear Sir; I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to possess all the knowledge of them, of their appearance, of the features of their conneance, and of the character and labits of their mind, which we can acquire. You have placed your numerous readers (at least you have mit, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently sputified to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly useful not only to the merchant, but to the stateman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am gind that thes been, and hope that it may continue to be, liberally patranized.

Offering you cordial assurances of my esteem and regard, I am truly your friend and obedient servant.

Extract of a letter from Hon. Millard Fillmore,

II have read it (Merchants' Magazine) with a good
deal of attention, and have no hesitation in eaving that I
think it one of the most valuable periodicals that was
ever published. To the merchant it seems quite indispersable, and to the statesman and man of general inforunation almost equally desirable. If is a grand repository
of useful facts and information, which can be found nowhere so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

where so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Latter from the Hon. Thomas H. Benton.

Washingson Citry, April 20, 1849.

Mr. Freeman Hunt.—Sr: I owe you many thanks for the opportunities I have had to read the Merchants' Magazine, and have found it in reality to be a majazine, and that well replentshed, of all the useful insiter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his business and the clevation of the mercantile character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist; and to all who are charged with managing the affairs of the mation. For myself, I have found it most useful to me in my senatorial labors, and have been in the habit for many years of carefully consulting it.

Yery respectfully, sir, your obedient servant, THOMAS H RENTON.

Letter from Hon, Win, H. Steard.

My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchants' Magazine. I regard it as an invaluable work for the use of all who would understand not merely commercial operations involved in the administration of the government.

I am, with great respect, your humble servant, Freeman Hunt, esq. WILLIAM H. SEWAID. The Merchants' Magazine is published monthly, at 142 Fulton Mrect, New York, by Freeman Hunt, esq. MILLIAM H. SFWAID.

WISE & BROTHER, Manufacturers of Boildoir, Grand, and Synare Pienos, request those who would be assured of a first class Plano, one that ladies can perform on with the greatest possible advantage—one that the toweh can be instantly adjusted to the exact strength of the fingers and invenment of music, one that will stand in concert time, one that the tone will not become shrill and crating, that is chaste of style and aleganity made up of straight and regular curve lines, that will last an age—to rive them a call. The ancient standing of the Britimiers factory, and liberal patronage of citizens and others of the first order of artistic tasts and science, conceded at once the most critical, have been fully anticipated. Their recently finished Grand Plano, minutely reviewed by the most accomplished civil neighbeers and master artists, has been denominated truly a Grand Plano; also, that their late Boulour, for style, power, and compass of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

COLD SPRING WATER CURE.

COLD SPRING WATER CURE.

THIS NEW AND SPLENDID ESTABLISHMENT for the scientific treatment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the stemboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-bouses and nurseries of the Mesers. Brodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Eric, the Ningarn flowing majestically towards the Ealls, extensive forests, and the "Queen City of the Lakes," with its moving panerama of steamboat and conscless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards celdeness and purity, by any in the United States. The house, recently exected at a cost of about seven thousand dollars, harbeen fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Medicine in Central Medical College, and Geo. W. Davis, M. D., formerly of Dansville, N. Y., the resident physician, and is perminiently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the friends of the establishment deem it a matter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical attainments, who has attended two courses of lectures in the Central Medical College, have been secured, and that female patients can at any time avail themselves of her invaluable aid and counsel.

The steward's department is under the control of a genternan eminently qualified for that position; and unweared pains will be taken to have every thing appertisiting to the establishment arranged on a plan, and conducted in a way, to ensure the comfort, and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the cure of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repu-

of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An eulightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolorable sufferings and broken constitutions have imperatively demanded "Reform". A return from a wide and fatal departure from the simplicity of Nature's laws is called for, sifke by a rational love of happiness and the deplorable exigencies of our condition. Hydregathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and returnshiply efficued ous mode of curing the sick; for that system of drugging, depleting, and curterising, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various water ture establishment in this country, to say nothing of any other, has fully confirmed the hopes of the carly discoverers and promulgators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found equal to the best, as regards the order, convenience, and destrabances of its arrangements. The institution is now open for the reception of patients, and in full operation.
